

The Biotech Growth Trust PLC

Information as at 30 November 2025

Investment Objective and Benchmark Index

The Biotech Growth Trust PLC (the "Company") seeks capital appreciation through investment in the worldwide biotechnology industry. Performance is measured against its benchmark index, the NASDAQ Biotechnology Index (net, total return, sterling adjusted).

Five Year Performance (%)

Past performance is not a guide to future performance. The value of investments and the income from them may fall as well as rise and is not guaranteed; an investor may receive back less than the original amount invested.

*Calculated at the financial year end, includes management fees and all other operating expenses, excludes performance fees.

**The Board has set the leverage limit for both the Gross and the Commitment basis at 130% of the Company's Net Asset Value.

***Active Share is expressed as a percentage and shows the extent to which a fund's holdings and their weightings differ from those of the fund's benchmark index. A fund that closely tracks its index might have a low Active Share of less than 20% and be considered passive, while a fund with an Active Share of 60% or higher is generally considered to be actively managed.

Investment Policy

In order to achieve its investment objective, the Company invests in a diversified portfolio of shares and related securities in biotechnology companies on a worldwide basis. The Company will not invest more than 15% of the value of its gross assets in any one individual stock at the time of acquisition. No more than 10% of gross assets will be invested in unquoted investments at the time of acquisition. This limit includes any investment or commitment to invest in private equity funds managed by OrbiMed or an affiliate thereof. Investments or commitments to invest in such private equity funds will be limited to US\$15m, after the deduction of proceeds of disposal and other returns of capital. The Company's borrowing policy is that borrowings will not exceed 20% of value of the Company's net assets. The Company may be unable to invest directly or efficiently in certain countries or share classes. In these circumstances, the Company may gain exposure by investing indirectly through swaps or other derivative instruments. Exposure to these financial instruments will count towards and be subject to the following limits: Derivative transactions (excluding equity swaps) can be used to mitigate risk and/or enhance return and will be restricted to an aggregate net exposure of 5% of the value of the gross assets measured at the time of the relevant transaction; Equity swaps may be used for efficient portfolio management purposes and aggregate net counterparty exposure through a combination of derivatives and equity swap transactions is restricted to 12% of the value of the gross assets of the Company at the time of the transaction.

Return vs Volatility (Annualised since Date of Appointment of OrbiMed) – Chart (%)

Commentary

In November, the NAV per share was up 6.7%, the share price was up 8.4% and the benchmark NASDAQ Biotechnology Index (net, total return, sterling adjusted) was up 7.6%.

Biotech continued to outperform the general markets in November. The macro environment shifted in favor of risk assets, beginning with the Federal Reserve's anticipated 25 basis point rate cut in early November, which was soon followed by some dovish comments from New York Federal Reserve President, John Williams, on November 21. Williams signaled "room for further adjustment in the near term," increasing the probability of a December rate cut and fueled liquidity-driven buying across our growth-oriented portfolio. Simultaneously, the resolution of the 43-day government shutdown in mid-November removed the fiscal uncertainty that had plagued broader U.S. markets. On the regulatory front, the appointment of Food and Drug Administration ("FDA") veteran Dr. Richard Pazdur as the new Director of the FDA's Center for Drug Evaluation and Research on November 11 was welcomed by the industry and investors as someone who could provide experienced leadership at the agency. On the M&A front, there were three deals with publicly-traded targets announced in November: Merck's \$9.2 billion deal to buy Cidara Therapeutics, Pfizer's \$10 billion deal to buy Metsera, and Day One Biopharmaceuticals' \$129 million deal to buy Mersana Therapeutics. The Company held shares of Cidara at the time of the acquisition announcement. With increasing M&A and Fed rate cuts likely continuing, we see further room for the biotech sector to outperform in the near term.

UroGen Pharma, Cogent Biosciences, and Relmada Therapeutics were the largest positive contributors to performance during the month. UroGen's stock appreciated after the company disclosed October sales for its recently launched bladder cancer drug Zusduri and reiterated the company's comfort with consensus 2025 sales expectations. Cogent outperformed after demonstrating better-than-expected efficacy data for treating gastrointestinal stromal tumors. Relmada's stock price surged after the company announced that it had secured alignment with the FDA on a regulatory strategy for its bladder cancer drug. The company also announced a significant financing round in which the fund participated.

UniQure, Praxis Precision Medicines, and Cybin Inc were the largest negative contributors to performance during the month. UniQure underperformed after an unexpected reversal in regulatory guidance from the FDA regarding whether the company's registration trial could be used as a primary basis for approval for its lead gene therapy asset for Huntington's disease. Praxis' share price declined after a short seller report questioned the robustness of the data for the company's Phase 3 trial of ulixacaltamide for essential tremor. Cybin underperformed in November on no fundamental news.

Discount / Premium Control Mechanism

The Directors have adopted an active discount management policy to establish and support an improved rating in the Company's shares through the use of share buybacks, with a view to limiting the discount to NAV per share at which the shares trade to no more than 6%. Shares bought back will be cancelled.

Risk Warnings

This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Before investing in the Company, or any other investment product, you should satisfy yourself as to its suitability and the risks involved, and you may wish to consult a financial adviser.

Any return you receive depends on future market performance and is uncertain. The Company does not seek any protection from future market performance so you could lose some or all of your investment. Shares of the Company are bought and sold on the London Stock Exchange (LSE). The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Company. Usually, at any given time, the price you pay for a share will be higher than the price you could sell it. For further information on the principal risks the Company is exposed to please refer to the Company's Annual Report or Investor Disclosure Document available at www.biotechggt.com. The Company can borrow to purchase investments, this could potentially magnify any losses or gains made by the Company.

Target Market

The Company is suitable for investors seeking an investment that aims to deliver total returns over the longer term (at least five years), is compatible with the needs for retail clients, professional clients and eligible counterparties, and is eligible for all distribution channels.

The Company may not be suitable for investors who are concerned about short-term volatility and performance, have low or no risk tolerance or are looking for capital protection, who are seeking a guaranteed or regular income, or a predictable return profile. The Company does not offer capital protection.

Value Assessment

Frostrow Capital LLP has conducted an annual Value Assessment on the Company in line with Financial Conduct Authority ("FCA") rules set out in the Consumer Duty regulation. The Assessment focuses on the nature of the product, including benefits received and its quality, limitations that are part of the product, expected total costs to clients and target market considerations.

Within this, the assessment considers quality of services, performance of the Company (against both benchmark and peers), total fees (including management fees and entry and exit fees as applicable to the Company), and also considers whether vulnerable consumers are able to receive fair value from the product.

Frostrow Capital LLP concluded that the Company is providing value based on the above assessment.

Important Information

The Biotech Growth Trust PLC is a public limited company whose shares are listed on the LSE and is registered with HMRC as an investment trust. The Company has an indeterminate life, although shareholders consider and vote on the continuation of the Company at least every five years. The next continuation vote will be held in 2028.

This financial promotion is issued by Frostrow Capital LLP which is authorised and regulated by the FCA.
